About This Book	i
About the Authors	ii
Additional Credits	ii
Foreword	iii
Introduction	v
Pre-Requisites	v
Versioning	v
The Journey	v
Following Along	vi
Providing Feedback	vi
A Note on Code Listings	vii
Lab Setup	ix
What You'll Need	ix
Setting Up a Virtual Machine	ix
Installing Windows 10	x
Adding Lab Files and Configuring PowerShell	xi
Assumptions Going Forward	xii
Classroom Delivery Guide	xiii
Code and Demos	xiii
Slides	xiv
Suggested Schedule	xiv
Delivery Notes	xvi
Part 1: PowerShell Toolmaking	1
Tool Design	2
Tools Do One Thing	2
Tools are Testable	2

CONTENTS

Tools are Flexible	3
Tools Look Native	4
For Example	4
Your Turn	7
Let's Review	9
Start with a Command	10
Your Turn	11
Let's Review	12
Build a Basic Function and Module	14
Start with a Basic Function	14
Create a Script Module	19
Pre-Req Check	21
Running the Command	21
Your Turn	22
Let's Review	25
Adding CmdletBinding and Parameterizing	27
About CmdletBinding and Common Parameters	27
Accepting Pipeline Input	29
Mandatory-ness	33
Parameter Validation	34
Parameter Aliases	34
Your Turn	35
Let's Review	38
Emitting Objects as Output	39
Assembling the Information	40
Constructing and Emitting Output	41
A Quick Test	42
Your Turn	44
Let's Review	48
An Interlude: Changing Your Approach	49
The Critique	50
Our Take	50
In Summary	53
Using Verbose, Warning, and Informational Output	54
Knowing the Six Channels	54
Adding Verbose and Warning Output	55
Doing More With Verbose	57
Informational Output	60

CONTENTS

Your Turn	67
Let's Review	71
Comment-Based Help	72
Where to Put Your Help	72
Getting Started	72
Going Further with Comment-Based Help	77
Broken Help	77
Your Turn	78
Let's Review	82
Handling Errors	83
Understanding Errors and Exceptions	83
Bad Handling	84
Two Reasons for Exception Handling	84
Handling Exceptions in Our Tool	85
Capturing the Actual Exception	89
Handling Exceptions for Non-Commands	89
Going Further with Exception Handling	89
Deprecated Exception Handling	90
Your Turn	90
Let's Review	96
Basic Debugging	98
Two Kinds of Bugs	98
The Ultimate Goal of Debugging	99
Developing Assumptions	99
Debugging Tool 1: Write-Debug	100
Debugging Tool 2: Set-PSBreakpoint	106
Debugging Tool 3: The PowerShell ISE	111
Your Turn	113
Let's Review	116
Part 2: Professional-Grade Toolmaking	118
Going Deeper with Parameters	119
Parameter Position	119
Validation	123
Multiple Parameter Sets	124
Value From Remaining Arguments	126
Help Message	126
Alias	126
More CmdletBinding	127

CONTENTS

A Demonstration	127
Let's Review	130
Writing Full Help	131
External Help	131
Using Platypus	133
Supporting Online Help	140
“About” Topics	140
Making Your Help Updatable	141
Your Turn	143
Let's Review	144
Unit Testing Your Code	145
Starting Point	145
Sketching Out the Test	146
Making Something to Test	147
Expanding the Test	148
But Wait, There’s More	151
Your Turn	151
Let's Review	154
Extending Output Types	155
Understanding Types	155
The Extensible Type System	155
Extending an Object	156
Using Update-TypeData	164
Next Steps	165
Analyzing Your Script	166
Performing a Basic Analysis	166
Analyzing the Analysis	167
Your Turn	168
Publishing Your Tools	170
Begin with a Manifest	170
Publishing to PowerShell Gallery	174
Publishing to Private Repositories or Galleries	175
Your Turn	176
Let's Review	177
Part 3: Controller Scripts and Working With Data	178
Basic Controllers: Automation Scripts and Menus	179
Building a Menu	179

CONTENTS

Using UIChoice	185
Writing a Process Controller	188
Your Turn	191
Let's Review	195
Proxy Functions	196
For Example	196
Creating the Proxy Base	196
Modifying the Proxy	199
Adding or Removing Parameters	202
Your Turn	203
Let's Review	205
Working with XML Data	207
Simple: CliXML	207
Importing Native XML	208
ConvertTo-XML	213
Creating native XML from scratch	214
Your Turn	217
Let's Review	219
Working with JSON Data	220
Converting to JSON	222
Converting from JSON	225
Your Turn	229
Let's Review	231
Working with SQL Server Data	232
SQL Server Terminology and Facts	232
Connecting to the Server and Database	233
Writing a Query	234
Running a Query	237
Invoke-Sqlcmd	239
Thinking About Tool Design Patterns	240
Let's Review	240
Review Answers	240
Final Exam	241
Lab One	242
The Problem	242
Break it Down	242
Do the Design	243

CONTENTS

Test the Commands	243
Code the Tool	244
Lab Two	251
The Project	251
Remember	251
Your Task	252
